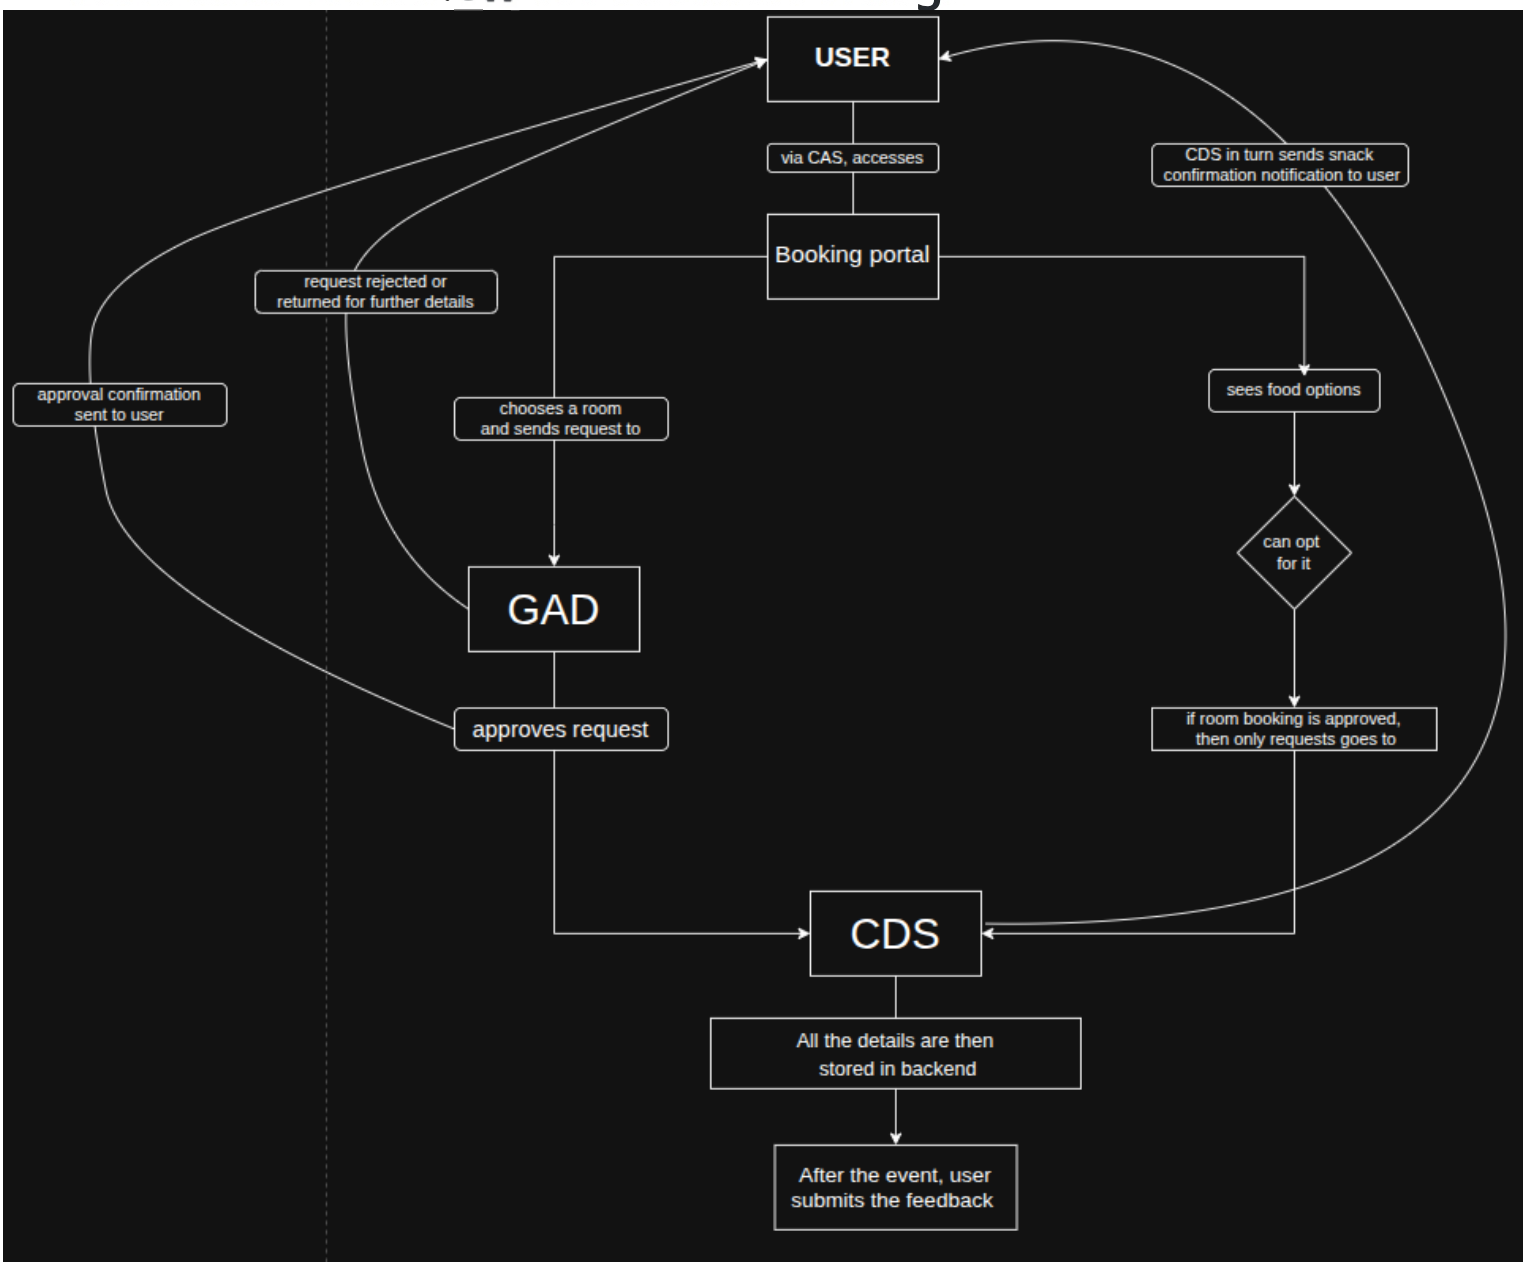
MoM-2

New user workflow for room booking:

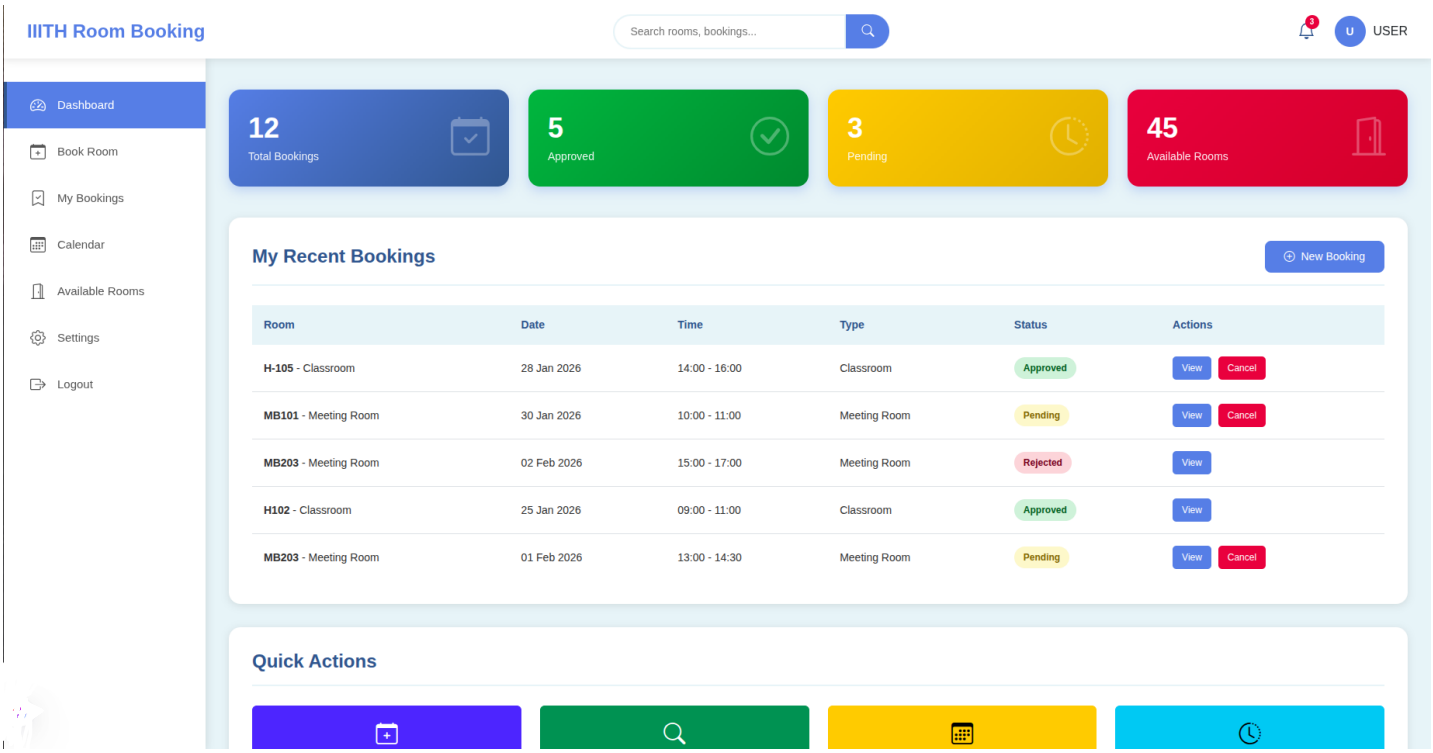


The user accesses the booking portal via CAS and selects a room, sending a booking request to GAD.
GAD reviews the request:

GAD approves,rejects or returns requests for more details, the user is notified.
If the user opts for food services, the request is sent to CDS only after the room booking is approved.

CDS sends confirmation of fsnack availaibility to the user.
The details are all stored in the backend.

After the event, the user submits feedback.

Further events:


- Meeting frequency changed to biweekly
- Client reviewed prototype for frontend and approved it.
